Technology, the Internet, and social media are great tools that can help us learn and do more in the classroom if we use them appropriately. Follow these guidelines for what is expected of you in class!

**Do**

1. Use search engines to clarify things that you don’t understand
2. Use the class discussion board to ask questions and help each other
3. Post work to get feedback from myself and your peers
4. Use Wikis to help enhance your understanding
5. Keep on task. You know what is appropriate.

**Don’t**

1. Have computers/phones out if I am requesting your full attention
2. Use Snapchat or Instagram
3. Use Facebook or Twitter unless you are visiting an official page for research
4. Share personal information online
5. Don’t waste class time.
